Dated:07.03.2025

To,

All interested parties

Subject: Final PUC and PCN methodology – Anti-Dumping investigation concerning imports of Nylon Filament Yarn from China and Vietnam

1. This has reference to the initiation notification no F. No. 6/48/2024-DGTR dated 26th December 2024. Through the notice of initiation, the interested parties were directed to provide their comments or suggestions, if any, for the finalization of the scope of product under consideration and the PCN methodology within the prescribed time limits.
2. Pursuant to the same, the domestic industry and the other interested parties were directed to file their submissions by 20th January 2025. The Authority has examined these submissions made by the domestic industry and the other interested parties.
3. It is clarified that the scope of this decision is limited to defining the scope of the product under consideration for the purposes of further investigation. This does not preclude interested parties from providing relevant information and evidence to substantiate their requests for exclusion of any particular products. The Authority shall decide the scope of the product under consideration for any measures recommended, after considering relevant information and evidence furnished by all interested parties, and after providing all parties an opportunity of being heard.
4. Other interested parties represented for exclusions of Yarn made with specific Deniers and Filaments, Mother yarn and certain Deniers of High Tenacity Nylon Filament Yarn.
5. The domestic industry has disputed the exclusions requested by other interested parties, except for high tenacity nylon yarn having 840 Deniers and above. The domestic industry has emphasized that the domestic industry has produced and supplied the like article to the products for which the exclusion has been sought.

6. In view of the above, it is clarified that High Tenacity Yarn with 840 Deniers and above is excluded from the scope of the product under consideration. The scope of the product stands amended as below.

“The product under consideration is “Synthetic Filament Yarn” made of Nylon also known as polyamide yarns or Nylon Filament Yarn. Nylon Filament Yarn is a synthetic filament yarn produced by polymerization of organic monomers. The product under consideration is multi-filament yarn. The product under consideration includes Mother Yarn, Fully Drawn Yarn, Partially Oriented Yarn, Draw Textured Yarn or Crimp Yarn, Air Textured Yarn, Air Covered Yarn, High Oriented Yarn and High Tenacity Yarn. All man-made filament yarns not having nylon or polyamides, are excluded from the scope of the product under consideration. The following are specifically excluded from the scope of the product under consideration.

- a. Mono filament yarn*
- b. Bulk Continuous Fiber*
- c. Nylon 66 yarn*
- d. Hot melt yarn*
- e. Low melt yarn*
- f. Bonded yarn*
- g. Conductive yarn*
- h. Anti-static yarn*
- i. Nomex and aramids yarn*
- j. High Tenacity Yarn with 840 Deniers and above.*

The product under consideration includes all kinds of synthetic filament yarns of Nylon or Polyamides, such as flat yarn - twisted and/or untwisted, fully drawn yarn (FDY), spin drawn yarn (SDY), fully oriented yarn (FOY), high oriented yarn (HOY), partially oriented yarn (POY), textured yarn – twisted and/or untwisted, and dyed yarn, single, double, multiple, folded or cabled, and high tenacity yarn of nylon classifiable within Chapter 54 under Customs heading 5402. The product includes all variants of Nylon (or Filament Yarn or Polyamide Yarns such as flat/ textured/ twisted/ untwisted, bright/semi dull/full-dull variants thereof), grey/ colored/ dyed (or variants thereof), single/double/ multiple/folded/cabled (or variants thereof), whether or not sized.”

7. With regard to the PCN methodology, the domestic industry has suggested making separate PCN based on yarn types, deniers, filaments, luster and colour. The other interested parties have requested for additional parameters, namely, speciality products; usage based on textile and industrial applications; prime and off-grade products and grade types.
8. The Authority notes that quality cannot be considered as the basis of PCN methodology. The same view has been taken in past investigations as well. Likewise, no PCN

methodology can be made for application, since the same has not been demonstrated to impact cost of production of the product.

9. In light of the comments received from the interested parties and after careful examination of the same, the Authority determines PCNs, as below.

SN	Parameter	Product Type	Code
1	Yarns	Partly Oriented Yarn / High Oriented Yarn	POY
		Flat yarn / Fully Drawn Yarn/ Spin Drawn / Draw winder / Mother Yarn	FDY
		High Tenacity yarn	HTY
		Draw Textured Yarn / Crimped Yarn	DTY
		Air Textured Yarn	ATY
		Air Covered Yarn	ACY
		Twisted and Cabled Yarn	TCY
		Other than above (please specify and give explanation/justification separately)	OTY
2	Denier	Next 3 digits denote denier, illustrated as below	xxx
		15 Denier	015
		20 Denier	020
		100 Denier	100
3	Filaments	Next 3 digits denote filaments, illustrated as below	xxx
		12 Filaments	012
		34 Filaments	034
		210 Filaments	210
4	Luster	Bright Luster	BR
		Semi Dull	SD
		Full Dull	FD
		Other than above (please specify and give explanation/justification separately)	OT
5	Colour	Raw White/Grey	GR
		Dope Dyed	DY
		Unidentified	UN
		Other than above (please specify and give explanation/justification separately)	OT

10. In view of the above, all interested parties are requested to file their questionnaire responses for the scope of the product under consideration set out above and in accordance with the above mentioned PCN-methodology latest by 6th April 2025.

11. No further extension of time will be granted by the Authority to file the questionnaire responses, as the anti-dumping investigation is time bound.
12. This issues with the approval of the Designated Authority.
