Dated: 02.02.2026

To,

All interested parties

Subject: Final PUC and PCN Methodology in the Anti-dumping investigation concerning imports of “Polyester Textured Yarn” (PTY) originating in or exported from the People’s Republic of China.

1. The subject investigation was initiated *vide* notification no. F. No. 6/57/2025-DGTR dated 20.11.2025. Subsequent to the initiation, letters were sent to all the known interested parties to submit their Questionnaire Responses, including the opportunity to submit their comments on the scope of the product under consideration (PUC) and propose product control numbers (PCNs), if any.
2. The Authority received comments from interested parties regarding product scope of PUC and its PCN methodology.
3. The Authority held a meeting on 07.01.2026, with all the interested parties including those who have made submissions within the stipulated deadline for discussion on the scope of the PUC and PCN methodology in the subject investigation.
4. After examination of the comments received from the interested parties and discussions held during the meeting, it has been noted that:
 - a. The product under consideration (hereinafter also referred to as "PUC") in the present investigation is Polyester Textured Yarn (“PTY”) also known as Drawn Textured Yarn (“DTY”) (hereinafter also referred to as "subject goods"). PTY is a synthetic multi-denier, multifilament yarn manufactured through heating, drawing and false twisting of partially oriented yarn (POY).
 - b. It is clarified that in Para 5 of the initiation notification, PTY manufactured from materials other than PET (both virgin and recycled), such as nylon, polypropylene and polyethylene are not covered within the scope of PUC. All PTY made from Polyethylene Terephthalate (i.e., polyester melt or PET chips) are covered in the product scope, whether or not they include other co-polymers/yarns.
5. It is clarified that the scope of PUC, as mentioned in para 4 above, is limited to defining the scope of the product under consideration for which the present investigation is being conducted. This does not preclude interested parties from providing relevant information and evidence to substantiate their requests for the exclusion of any particular product during the course of investigation. The Authority shall decide the upon the requests for exclusions from the scope of the product under consideration, after considering the relevant information and evidence furnished by all interested parties, if any. Therefore, the interested parties are

advised to submit all supporting information and evidence for their claims within the timeframe specified in this notice.

6. Further, based on the examination of submissions received from the interested parties, the Authority hereby adopts the PCN methodology as mentioned in the table below:
