Date: 31.07.2026

To,
All interested parties

Subject: PUC/PCN methodology in the anti-dumping investigation concerning imports of “Para Nonylphenol originating from Russia and Taiwan”.

1. Attention of all interested parties is invited to the above-mentioned investigation initiated vide Notification No. 6/22/2026-DGTR dated 23rd June 2026. The non-confidential version of the application filed by the domestic industry was shared with concerned interested parties vide Letter/Email dated 25th June 2026.
2. Whereby, the interested parties were granted an opportunity to present their comments on the scope of the product under consideration (PUC), and product control number (PCN) methodology, within a period of 15 days from the date of intimation, which ended on 10th July 2026.
3. The product under consideration (hereinafter referred to as “PUC”) was defined as under:

“The product under consideration is “Para Nonylphenol originating in or exported from Russia and Taiwan”. Para Nonylphenol is a chemical compound, also known as 4-nonylphenol. It is used as an intermediate in various chemical reactions. It is a transparent, viscous liquid produced by alkylating phenol. PNP is soluble in certain organic solvents but less soluble in water. The chemical formula and structure of PNP is C₁₅H₂₄O.”
4. No PCN methodology was proposed in the initiation notification.
5. No comments in regard to the scope of PUC and PCN have been received from any interested party and therefore the authority adopts the same scope of product under consideration as notified in the initiation Notification No.6/22/2026-DGTR dated 23rd June 2026 without any changes and no PCN methodology is adopted in this case.
6. This communication is limited to clarifying the scope of the product under consideration for which the present investigation is being conducted. This does not preclude interested parties from providing relevant information and evidence to substantiate their requests for exclusion for any particular product. The Authority shall decide the scope of the product under consideration for any measures recommended, after considering relevant information and evidence furnished by all interested parties during the course of the investigation.
